November 19, 1999

1999 USDA Annual Report of Research Facility

ATTACHMENTS- BRIDGEWATER SITE

FEBRUARY 1, 1999 - SEPTEMBER 30, 1999

CATEGORY E-

1. Five canines in a high dose group of a toxicology study experienced convulsions. These animals were removed from the study and euthanized.
2. Eighteen Guinea Pigs while undergoing testing exhibited signs of distress due to their inability to vomit.
3. Twenty-four Ferrets involved in an emesis assay were determined to be exhibiting signs of distress during a three-hour period of vomiting. Although vomiting is a natural bodily response and not considered painful it is perceived as distressful.

MEDICAL INTERVENTION WOULD HAVE INTRODUCED UNCONTROLLED VARIABILITIES INTO THE STUDIES AND THIS WOULD RENDER THE RESULTS UNINTERPRETABLE.

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain- relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report).	F. TOTAL NO OF ANIMALS (Cols. C + D + E)
4. Dogs			70		70
5. Cats					
6. Guinea Pigs			117		117
7. Hamsters					
8. Rabbits			34		34
9. Non-human Primates					
10. Sheep					
11. Pigs			50		50
12. Other Farm Animals					
13. Other Animals					
Ferrets	--		7		7

ASSURANCE STATEMENTS

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.
