ASSURANCE STATEMENT

- 1) Professional and follow-up standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

Annual Report of Research Facility
October 28, 1999
Registration No. 32-R-0005

The 9 dogs included in column "E" were used in routine toxicity studies of new pharmaceutical compounds. During repeat-dose studies these dogs showed marked side effects attributed to the test compound.

These studies were performed in compliance with Good Laboratory Practice Regulations of the Food and Drug Administration. The use of anesthetic, analgesic, or tranquilizer agents was not possible because of their potential interference with the toxicity profile of the new pharmaceutical compounds.

Summary of Exceptions

There were no exceptions to the standards and regulations during this reporting period.
